

## Results Filtering

### Anti Spam Filter

☐ Enable Anti Spam Filtering

### Engine Bombing Protection

Engine Bombing occurs when multiple results having the same domain name enter the results list.

Allow  results having same domain name to enter the results list.

☐ Consider sub-domains as folders of the same domain (expands engine bombing protection to sub-domains).

## Results Ranking and Presentation

### Ranking Algorithm

Determine how the collected results will be ranked, by employing one (or more) of the supported algorithms.

- ☐ KE Algorithm (KEA).
- ☐ Borda Count Method (BCM).
- ☐ KEA vs BCM (Comparison Mode - Experimental).
- ☒ Geography Aware KE Algorithm (GAKE).

#### Weights Selection

- Define the weight for results with the same locality as yours.
- Define the weight for results written in a language intimate to you.
- Define the weight for results with generic domain extensions (n.x, .com, .net κλn).
- Define the weight for results with URLs that contain regional information not related to you.
